1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakata et al.

Note Fig. 2, where the input signal VIN corresponds to applicant's input SE_L; the inverter FETs Q9 and Q8 correspond to applicant's inverter FETs 202 and 206, respectively; the impedance FETs Q10 and Q11 correspond to applicant's impedance FETs 208 and 204, respectively; and the sense amplifier coupled to voltage bias generator VTBG corresponds to applicant's sense amplifier 106. Because all of the elements of the enable driver and sense amplifier of the instant invention (Fig. 2 of the drawings) are disclosed in Fig. 2 of Sakata et al, claims 1-38 are deemed to be fully anticipated (both structural and functional limitations).
